Pg 2.....

- o Ideal to provide SMS notifications for **fridges/freezers/computer/server/air-conditioned rooms**.
- o Reports to **4 cell phone users** when temperature goes above or below the range you are monitoring.
- o **LCD screen** on which you can check the temperature.
- o Also monitors **power loss/restore** (Eskom power). It notifies you via SMS when the power is off/on.
- o Temperature range is **adjustable** by the user (you programme it yourself).
- o Plugs into wall with a **three-point plug** & operate – no installation needed.
- o It has a **1m wire** (6-core) with a temperature **probe at the edge** that you **put inside the fridge**, under though the rubber of the door (the whole system is not put inside the fridge/freezer).
- o It has a **1 Amp battery** inside, which will give you a **battery back-up** time of **2-hours**.
- o A **water sensor** can be added so that you are notified when **water levels** are above or below a certain level (e.g. of a water or borehole tank).
- o Example configurations: -0.5°c to + 8°c / 15 minutes delay / 10 minute reading intervals / 4 #'s for sms alerts
- o Extra Temperature Sensors with 16x2 or 20x4 line LCD
- o A custom SMS Temperature Alert can be made up to monitor up to **12 fridges** if you connect extra sensors Each extra sensor can be up to **80m away** from the main SMS Temperature Alert, on the same premises.

### Applications:

Pharmaceutical/ poultry/ beef/ distribution / Server room cold chain monitoring.
